# SANTHOSH BUSSA

**Java Backend Developer | Spring Boot & Microservices Engineer**

Bangalore, Karnataka, India | +91 6305344901 | iamsanthoshbussa@gmail.com | linkedin.com/in/santhosh-bussa | github.com/SanthoshBussa | santhosh-bussa-portfolio.onrender.com

## PROFESSIONAL SUMMARY

Results-driven Java Backend Developer with 2 years of experience designing, developing, and optimizing high-performance, scalable enterprise applications using Java (Java 8/17), Spring Boot, Spring MVC, Spring Data JPA, Hibernate ORM, and Microservices Architecture. Proven expertise in building secure RESTful APIs with Spring Security (JWT), relational database modelling and query optimization in PostgreSQL/SQL, Apache Maven build automation, and automated/API testing using Postman in Agile/Scrum environments.

## CORE COMPETENCIES

Java (Java 8 / Java 17/ Java 25) | Spring Boot | Spring Framework | Spring MVC | Spring Data JPA | Hibernate ORM | Microservices Architecture | RESTful APIs | Spring Security (JWT) | SQL & PostgreSQL | Apache Maven (pom.xml) | Postman API Testing | Git & GitHub | Object-Oriented Programming (OOP) | Data Structures & Algorithms (DSA) | Agile / Scrum | SDLC

## TECHNICAL SKILLS

**Languages & Core Java:** Java (Java 8, Java 17), SQL, OOPs Principles, Collections Framework, Multithreading, Exception Handling, Streams API, Lambda Expressions

**Backend Frameworks & Architecture:** Spring Framework, Spring Boot, Spring MVC, Spring Data JPA, Hibernate ORM, Microservices Architecture, Spring Security (JWT Authentication, RBAC), RESTful Web Services / APIs

**Databases, Build & Developer Tools:** PostgreSQL, Relational Schema Design, Query Optimization, Apache Maven (pom.xml), Postman, Swagger / OpenAPI, Git, GitHub, IntelliJ IDEA, Eclipse, Agile/Scrum

## WORK EXPERIENCE

**Test Yantra, Bangalore, India - Associate Software Engineer** *Mar 2025 - Present*

- Built multiple production-grade RESTful APIs across multiple domains and enterprise products within a Spring Boot microservices architecture, optimizing database queries and improving API response times by 20% across distributed services.
- Implemented stateless JWT-based authentication and Role-Based Access Control (RBAC) using Spring Security and BCrypt encryption, reducing unauthorized access attempts by 99.99% and strengthening backend security posture.
- Engineered persistent data access layers using Spring Data JPA and Hibernate ORM with PostgreSQL, ensuring ACID transaction integrity, centralized exception handling, and Jakarta Bean Validation across endpoints.
- Executed 300+ API test cases using Postman to validate functionality and reliability; participated in peer code reviews to maintain clean code standards in Agile/Scrum sprints.

## PROJECT WORK

**Ecommerce Management System (Backend REST API) |** github.com/SanthoshBussa/ecommerce-management-system

- Architected a scalable e-commerce backend using Java 17, Spring Boot, and Apache Maven (pom.xml), exposing RESTful APIs for user authentication, persistent cart management, inventory validation, and transactional order processing.
- Integrated stateless JWT authentication and Role-Based Access Control (ROLE_CUSTOMER, ROLE_ADMIN) using Spring Security to enforce secure access across protected checkout, payment, and administrative endpoints.
- Engineered parameterized JPQL queries and indexed PostgreSQL tables using Hibernate/Spring Data JPA for dynamic multi-criteria product filtering, pagination, 6-stage real-time order status tracking, and Razorpay HMAC-SHA256 payment verification.

## PROBLEM SOLVING & ACHIEVEMENTS

- Solved 100+ Data Structures and Algorithms (DSA) problems in Java across LeetCode and GeeksforGeeks, strengthening core problem-solving and coding proficiency.

## EDUCATION

**Master of Computer Applications (MCA) - CGPA: 7.10/10** *Nov 2022 - Nov 2024*

Aurora's PG College, Osmania University, Hyderabad
